

# Community Hospital

of the Monterey Peninsula  
Montage Health

## Vision statement

Improving lives by delivering exceptional care and inspiring the pursuit of optimal health.

## Mission statement

We believe our community's greatest resource is the health of its people. Our family of organizations is dedicated to the pursuit of optimal health for all people in Monterey County, from birth to end of life.

We believe the achievement of optimal health requires pro-active partnering with physicians and other clinicians, healthcare and community organizations, and, most importantly, each person we serve. Achieving this goal requires our ongoing commitment to delivering exceptional value-based care that is:

- preventive (building and retaining health),
- restorative (facilitating recovery from illness or injury), and
- palliative (maximizing well-being when recovery is not possible).

We are dedicated to care that is coordinated across all care settings to meet each person's own goals and needs.

We believe optimal health on an individual level is possible only when each person actively participates in their own healthcare. We inspire that participation through personalized information, education, and support, provided by a coordinated and compassionate team.
